What TORIK does:

TORIK Stone Cleaning System provides the option of chemical-free cleaning.

TORIK produces a controllable stream of high pressure super-heated water and steam that quickly removes grime, moss, algae, fungi and other biological matter. The superheated water and steam also kills spores thereby eliminating the source of biological growth.

Cleaning and paint removal with the TORIK system is gentle, safe and effective for use on stonework and brick masonry

- Stone and Masonry cleaning
- Grime removal
- Algae and moss removal
- Cleaning and sterilisation
- Paint stripping
- Bitumen removal
- Graffiti and chewing gum removal
- Oil and grease cleaning

Product Specifications:

Variable pressure and heat

Maximum pressure: 150bar
Maximum flow: 8 litres per minute
Maximum temperature: 150°C

TORIK Burner Unit L70xW57XH80 cm
Water volume minimum: 5 litres per minute in
Motor voltage: 230 volt or 110 volt
Fuel for burner: diesel
Heating power: 85 kw
Net weight: 60 kg
16 amp plug in power supply from the pressure washer

How TORIK works?

TORIK stone cleaning system is a two-component piece of equipment that is mobile enough to be transported in a van, yet robust enough for even the toughest stone cleaning projects.

TORIK generates superheated water in a diesel burner and an electric pump generates the controllable high pressure delivered through a high pressure lance. The operator has full control of pressure and temperature for optimal cleaning and surface protection. The 15° to 25° cleaning edge is created with a ceramic nozzle for optimal precision.

TORIK Pressure Washer Unit L60xW40XH40 cm
Working pressure: 150 bar (2175 psi)
Water volume maximum: 8 litres per minute
Motor voltage: 230 volt or 110 volt
Net weight: 40 kg
110 volt power requirements: transformer 32 amp
- 5kva generator - 5.5kw min

Standard equipment:

10 metres high-pressure hose
Wash gun and lance with rinse function
900mm single lance
500mm single lance

Price: £ 3,950 plus carriage and VAT.
